WORK EXPERIENCE

- Operations Intern, Yashuss Unlimited Business Solutions** 04/2026 – Present
Mumbai, India
- Led a three-week overhaul of the company's email operations, consolidating scattered mail flows across all users and domains into one governed setup.
 - Built a Day 0 → 30 → 90 offboarding workflow and a user classification model, turning ad-hoc handling into a repeatable process for HR and IT.
 - Documented routing rules, policies, and controls into a single implementation plan, improving consistency, auditability, and operational efficiency.
- ITSM Analyst Intern, Indorama Ventures Pvt. Ltd** 05/2024 – 07/2024
Thailand, Bangkok
- Analyzed enterprise data across identity management, access control, and license inventory systems to surface process gaps and operational inefficiencies.
 - Reviewed directory and licensing records to flag inconsistencies and duplication, contributing to cleaner system structures, better scalability, and compliance readiness.
- Head of Design, Abe&Bie** 10/2023 – Present
Jaipur, India
- A tech-driven brand specialising in oversized streetwear t-shirts, overlooked the end-to-end design process, from initial sketches and fabric selection to final product development and production.
 - Tracked product, vendor, and sales performance data to inform design and production decisions, building intuition for unit economics and customer, perceived value.

PERSONAL PROJECTS

- Documind** 📄, *End-to-end AI-powered, RAG document analysis platform using FastAPI and React.js* 2025 – Present
- Implemented document processing pipeline with OpenAI/Gemini integration for intelligent document parsing and Q&A functionality.
 - Successfully deployed on Render.com 📄 with automated CI/CD pipeline, handling 1000+ document uploads.
 - Scalable Architecture. Built microservices architecture supporting multiple document formats (PDF,DOCX,TEXT) with 99.9% uptime.
 - Designed the information architecture and evaluation logic for document parsing and retrieval-augmented generation (RAG), balancing accuracy, latency, and cost trade-offs across LLM providers.
- FlowSocial** 📄, *A privacy-centric social media platform* 2023 – Present
- Worked on a social product centered around personalization without compromising user privacy, leveraging federated learning concepts.
 - Helped align technical architecture with user-facing outcomes, ensuring complexity served the product rather than becoming a tax.
- Electronic Arts, Product Management Job Simulation on Forage** 2025
- Analysed game KPIs and selected appropriate performance metrics for solving strategy-based business problems.
 - Structured a data-driven feature presentation aligning product decisions with measurable outcomes.

EDUCATION

- B.Tech in Computer and Communications, Manipal University Jaipur** 09/2022 – 05/2026
- HSC, PACE Junieur Science College, Andheri** 2020 – 2022

SKILLS

- Fast API/ Rest API
- HTML/CSS
- PowerBI
- C/C++
- SQL
- Excel
- Git/GitHub
- GTM/LLMs

CERTIFICATES

- Smart Contracts, Blockchain (Coursera)
- Decentralised Applications (Coursera)
- Oracle Academy Java Foundations
- CISCO Networking Academy - CCNAv7 Introduction to Networks
- Red Hat Operating Systems
- Oracle Academy Database Management
- Electronic Arts Product Management Job Simulation on Forage - June 2025 (Forage)
- OpenShift Administration I, OpenStack Administration I, OpenShift Applications 4.6 (RedHat)
